Attachments: Further information re: Montara WHP clearing & H1 ST-1 plugging SCR; Letter NOPSA Submission - Montara Construction Installation Safety Case Revision - WHP Clearing .pdf

Sorry Catherine, I was away yesterday.

Rev 0 was submitted to NOPSA, then they responded with a request for further information which goes into Rev1 but is usually not required to be submitted to NOPSA, it is just issued for use – an acceptance letter would normally say something along the lines of 'please ensure any requests for further information are incorporated into the final safety case – this does not need to be submitted to NOPSA'. Rev 0 was not submitted by email, we hand delivered it – letter is attached. The attached email is the only one I have in my records relating to the request for further information on Rev 0.

After the fire, we revved it up to Rev 2 and resubmitted it to NOPSA. They responded with a sequence of requests which were rolled into Rev 3, which was also submitted to NOPSA at their request to demonstrate that all of the requests had been incorporated (this is not a usual requirement).

Cheers,
Chris

Subject: Saftey case

I'm going crazy.

Iv gone through the emails you have sent me, plus your corro with NOSPA, however I cannot find your submissions to NOPSA of the WHP Clearing & Plugging SC **Rev0** and **Rev1**.

Can you pls send me copies of your emails to NOPSA attaching Rev0 and Rev1.

thanks

Regards
