**RE: Submission to The Commission of Inquiry – Montara Well Head Platform
Uncontrolled Hydrocarbon Release**

I strongly believe there should be no further expansion of the petroleum industry on the North-West shelf of Australia's Kimberley region until such time as:

1. A network of marine parks with large sanctuaries is established in the Kimberley region to serve as protection from events like the West Atlas oil spill (Term of Reference 10);
2. It can be shown that proposals for expansion of the North-West petroleum industry are fully compliant with binding national climate change policies and targets (Term of Reference 11);
3. Faster response time mechanisms and improved oil spill procedures are developed and adopted – with strong independent compliance enforcement. (Term of Reference 8)

The recent disastrous West Atlas oil spill demonstrated how as a nation we are ill equipped to respond to such situations. No further developments should be allowed in the Kimberley area until it can be demonstrated that effective emergency response facilities are readily available. Our marine environment is too valuable to risk by being ill prepared.

Yours Sincerely,

Allan Evans – Concerned Citizen
