**RE: Submission to The Commission of Inquiry – Montara Well Head Platform
Uncontrolled Hydrocarbon Release**

I strongly believe there should be no further expansion of the petroleum industry on the North-West shelf of Australia's Kimberley region until such time as:

1. A network of marine parks with large sanctuaries is established in the Kimberley region to serve as protection from events like the West Atlas oil spill (Term of Reference 10);
2. It can be shown that proposals for expansion of the North-West petroleum industry are fully compliant with binding national climate change policies and targets (Term of Reference 11);
3. Faster response time mechanisms and improved oil spill procedures are developed and adopted – with strong independent compliance enforcement. (Term of Reference 8)
4. A carbon emissions policy has been drawn up and set into place. How can we create an industry for sustainable resources if the old ones are not made accountable for their lack of green technology and attitudes?

Yours Sincerely,

Holli Parker
West Australian Resident
